**VOL. 21 - NO. 2**

**MARCH-APRIL 2013**

## **NS HERITAGE PAINT SCHEMES ANNOUNCEMENT**

Aristo-Craft Trains leads the Large Scale pack with the announcement of a limited edition production of all twenty of the Norfolk Southern Heritage paint schemes.

Scott Polk, President of Aristo-Craft Trains tweeted, "We just ordered Dash 9s in ALL of the NEW 20 Norfolk Southern Heritage paint schemes." He was excited to add that these outstanding Heritage paint schemes will be available to consumers as complete sets of 20, customer-configured sets of 10 and as individual locomotives. "This is a significant investment for us in challenging economic times. It clearly demonstrates our commitment to G Gauge and to listening to our customers' suggestions. Our customers can be sure that we will continue our tradition of offering the highest quality paint and decoration and the Dash-9's

outstanding prototype fidelity. This is also backed by the hobby's best warranty, at a limited run price point that will make these units an exceptional value. We'll announce pricing and delivery dates as unit quality control testing and evaluation is completed. It's my hope to have these units available for the 2013 Holiday Season."

Norfolk Southern (<http://www.nscorp.com/nscportal/nscorp/Community/Heritage%20Locomotives>) had honored its history at their

2012 30th anniversary party held at the NC Transportation Museum in Spencer, NC. In celebration of their heritage, NS had 20 new locomotives painted in commemorative schemes representing its predecessor railroads. Aristo-Craft's Heritage Fleet will bring these once-in-a lifetime paint schemes to your Large Scale model railroad or display case.

Aristo-Craft Trains is a Polk's Model Craft Hobbies company headquartered in Irvington, NJ. For over 70 years the company has prided itself in manufacturing the best toy and model trains in the industry while maintaining their focus on the consumer.

More information, as it becomes available, will be posted on the Aristo-Craft Trains Forum at: [www.aristocraft.com](http://www.aristocraft.com) and announced through the company's Twitter feed @ [twitter.com/ggaugetrains](https://twitter.com/ggaugetrains).

## LOOKING AHEAD ABOUT THE REVOLUTION RC SYSTEM

by Lewis Polk

To look forward about the Revolution, we first have to look backwards. We had the first Revolution ready in 1990, but we received a massive

law suit by LGB in that year and we were put off, having to look for legal representation. We got the product out in 1992 and it was made in Korea, even though we had moved our train manufacturing to China. At that time we used 27 MHz components as they had been available for some 40 years at that time. However the parts were assembled by hand insertion on to single sided boards. Each part needed to be inserted on a production line with different people putting in different parts. In other words, no one person inserted all of the parts on a board. If a person did this all day, inevitably certain parts were placed incorrectly. Unfortunately, there was no way to check the integrity of the board until after it was fully completed, and if not working, it took a supervisor to try and find the error and rectify the problem or throw the board out.

Once all of the parts were inserted into the board, it was placed in a bath of solder and floated around until all of the parts received a full application of the solder. At the end of the process, the boards were removed and put through a cutting process that cut off the extra wire lengths that were used to insert the parts through the holes in the board. Only after this cutting process could the boards be placed into a testing jig that would verify the working of the electronics as designed.

It was a slow process and required

# THE REVOLUTION TRAIN ENGINEER

**THE WIRELESS "REVOLUTION" IS HERE!**

Get ready for the most advanced model railroad control system on the market, the CRE-57000 Train Engineer Revolution by Aristo-Craft Trains. With all-new features and 21st-century technology, this newest version of the Train Engineer will be the perfect fit for hobbyists everywhere.

- Wireless locomotive radio control for indoor and outdoor layouts. Bi-directional communication between TX and RX.
- Glitch-free, fast 2.4 Ghz (DSSS) transmission!
- Large LCD screen with backlight for night operation or in low light areas.
- Easy-to-hold transmitter! Input data is handled like cell phone texting using the handheld's keyboard.
- No codes to memorize. All functions available on screen in simple English.
- Direct control of up to 50 locomotives or accessories.
- All programming is done in the transmitter and then down-linked to the receiver/decoder.
- Multiple group codes, so your "all stop" command will only affect all locos in your group or selectively all trains operating on the layout.
- Operates either with onboard battery or track power.
- Excellent 300' indoor range and 500' outdoor range is beyond the line of sight of any locomotive on any size layout.
- Speed settings are programmable up to 1,024 steps for incremental control beyond anything conceived in DCC and allows for totally prototypical switching techniques.
- Plug and play installation on Aristo-Craft locos.
- Superior 5-Year Warranty!

**NOW WITH SOUND!**

New 2012 productions of the Train Engineer Revolution feature generic diesel and steam sounds that are selectable on-screen. Coming soon will be sounds for specific locos that are downloadable from the Internet.

### 2012 Ad for the Train Engineer Revolution

huge labor forces doing mind numbing work all day long. Since the parts were color-coded, you had to be sure no-one in the insertion process was color blind. Later new robotics took over this process and a single machine could do the work of 100 people. All of the parts had to be produced on rolls to allow the parts to be "picked and placed" in the correct place on the board. These parts stuck

by glue to a pattern printed on the boards that melted when placed into a heat tunnel and then exited as a completed assembly ready for testing.

27 MHz was good for models run by gasoline engines, but not with electric motors that created a "dirty"

(Continued on Page 3)

# ARISTO-CRAFT INSIDER

## LOOKING AHEAD ABOUT THE REVOLUTION RC SYSTEM

(Continued from page 2)

noise that interfered with the range of the radio control systems. Model airplanes, boats and cars migrated to 72-75 MHz that was less susceptible to such interference, but when electric models came into more popularity, the motors still need great suppression to allow better range for the radios. Therefore, we moved to these frequencies and suppressed our motors. This was fine with our own locos, but we couldn't get the other makers to use proper suppression.

During this period, 2.4 ghz came into use in the model field as there were no private frequencies assigned and the signals hopped if interfered with. This was an offshoot from mobile telephones that started being used in the millions in a variety of super high frequencies, if not 2.4 precisely. The explosion of usage brought prices down dramatically and in parts on rolls made for the new robotic machinery. Also, 2.4 ghz is an internationally used and approved internationally under ISM or Industry, Science and Manufacturing world-wide.

While there were several 2.4 Ghz

chips in use, we waited for an all in one type of chip that did everything on one major chip produced by Texas Instruments. We coupled this chip with a large screen, by model usage standards, and allowed a descriptive choice on the screen. Then we chose a controller design that was similar to a phone that would not be frightening to an age group that was not familiar with high-tech devices in general. We had looked at DCC originally and took an assignment registration, but concluded that DCC was good, but we would be at the end of the line making a similar system. It was our opinion that we could make a useful product, without resorting to the long list of formulas needed to be applied to make a working product. While we were quite capable of having a radio system with a similar function of all of the codes in our unique function design, it was felt that those people who wanted the voluminous range of commands were already satisfied with what was on the market. They did not need us to duplicate a market need, but rather we wanted to reach those less engineering adept.

Yes, radio control is more suited out

of doors, where Mother-Nature-related dislocation of track connections and track cleanliness were harder to achieve unless you lived in temperate climates. We believe in the 80-20 rule in most of our business decisions and in this case we felt that 20% of the market would not use our newer system, while 80% would.

The answer is that we were correct in our assessment and several years later the continued success of the product line, the high quality of the build levels and constant upgrading of parts as they became available has insured the viability of the Revolution line.

Therefore, it's time to look ahead and see where we will be several years from now.

Do we need to add more functionality as done incessantly in DCC. With tongue-in-cheek, do we need to be able to control the speed of the windshield wiper on a loco? I chose this metaphor; as it's not really something DCC does, but is a capability that is possible if you motorized the wipers. It's an illustration, but we know of other finite controls that others do just because it can be done.

We did use a dependable radio system with a good range and an easy to learn programming curve that encompasses features that most people will and can use easily. Our multiple unit control from any position in a consist, even if used as a booster in the middle of the train, works easily and has most of the features wanted, such as: directional motors, directional lighting, momentum, sound control and smoke control. We separated the smoke from the main board as it uses more power than all of the other functions combined, but allowed full

Photo Credit: Stan Cedarleaf

(Continued on Page 4)

# ARISTO-CRAFT INSIDER

## LOOKING AHEAD ABOUT THE REVOLUTION RC SYSTEM

(Continued from Page 3)

control. The Revolution board can be operated on D.C. powered track as well as A.C. and DCC powered track along with battery operation.

Thus we can utilize our system in all gauges of model trains, regardless of the power source used. Since H.O. already has a universal port, we will make an H.O. version board and feature it with battery operation. Thus cleanliness of the track and continuity problems go away. You can share a loco between users in different areas of the layout plus have all of the main features detailed above.

In O gauge there is no universal adapted for the main in locos, so we are offering an easy to use adaptor. We make O Gauge too, but we are such a minor player there we can't influence the market place at this point. N gauge is out of our size capabilities for the moment, but miniaturization of parts continues and we have hoped for the future there too.

However, this does not increase the functionality in our home field advantage area of G Gauge. We will gladly look at ideas on our forum with recommendations of add on features to see what's most in demand. We are looking for control of the entire environment of the layout. Therefore, we will supply NiCad battery packs to power switches and other accessories out of doors at the operation site, eliminating the needs for running wires to remote sections of the layout.

We do have a basic diesel and loco sound now, with the next step being a choice of bells horns and whistles initially. As we can find the time we will introduce other sounds, but sounds are a very time-consuming engineering function that will need

outside contributors. It's the recording of the sounds and the programming of the functions into our system that is costly, time-consuming and complicated.

We have fully designed and tested a USB board that can be plugged into a P.C. computer combined with and onboard transmitter that will allow upgrades to the main transmitter without sending the transmitter to us and allow sounds to be downloaded at will. This will allow constant upgrades to features as they are developed and the code can be protected with 128-bit security of our intellectual property rights.

We will also do infrared controls for

switches and all sorts of accessories all operated by radio control with a 15' range of the switch from the r/c remote receiver operated by battery. As component prices continue to plummet we will look at pad-like interfaces where your layout can be shown on a screen and all controls be operated from a more visual controller. We need the number of users to be greater to make this happen along with a recovery of the economy. It's time consuming and needs a way to export the radio signal to a receiver module in between.

We will do periodic updates available for download as often as a consensus on needed features is agreed to.

### **Train Engineer To-Do List for 2013:**

- **99 Models in memory**
- **Emergency stop**
- **Add bells, whistles and horn choices to our sounds**
- **Offer a download USB/transmitter**
- **Add a volume graduated control**
- **Adjust soft keys for a better fit**
- **Add a smoke unit/accessory unit to every receiver**
- **Make an H.O. Board with sounds**
- **Sell our own battery pack with our own charging/protection circuit**
- **Do a smoke indicator on screen**
- **Ask for suggestions on our forum in a sub category**
- **Make a low cost unit for basic controls using a different control chip**
- **Make our own (Revolution) high amperage power supply.**
- **Add the Revolution access to our 0-4-0 along with our patented gear system**

# ARISTO-CRAFT INSIDER

## GRANDPARENTING AND MODEL TRAINS

by Lewis Polk

I'm a grandparent as many of you are. I feel it's a wonderful opportunity to pass along the joy and informational story of how trains helped and still

does help America grow. The story of how real trains allowed us to unify the westward expansion from the East Coast to the West Coast and all other points in-between is a history lesson we should all know and cherish.

The replication of a small section of real estate that reflects the effort and engineering that was part of that expansion was truly a modern marvel. The joining of the Golden Spike, the Flagler Railroad to Key West, FL and

thousands of other short lines and national lines are the fabric of how we became the country we are today.

Teaching about that mastery joined with the fun of running technically marvelous "Toys" is a "Win-Win" story that can tie your hobby to your "true re-incarnation" and pass the enthusiasm of history and model trains along.

Not only can you connect on the history lesson, but also all the mechanical insight that went into building your layout. I can't tell you how many times I've heard the story about your father buying you your first train set and the memory connection to the best of your father's impact on your life.

I think a grandfather-grandson day at

your train club each year on Father's Day or Grandfather's Day would be a high attendance day at your club or family get-together.

It certainly can be a memorable day, but you should do a lesson plan about trains and give it to your grandson at the end of the day. I have two daughters and a granddaughter along with a son and one grandson, so I'm not trying to be sexist, but the fact is there is a difference and I'll let sociologists to work it out.

If you do have such an event please post pictures on our Aristo-Craft fan page.

### EAST COAST LARGE SCALE TRAIN SHOW

**March 22-23, 2013**

**YORK FAIRGROUNDS, YORK, PA**

<http://www.largescaletrainshows.com>

For GPS directions, use:

York Expo Center, 334 Carlisle Ave., York, PA 17404

**ADMISSION:** TWO-DAY TICKET ADULT - \$18  
CHILDREN UNDER 12 FREE  
ONE-DAY TICKET ADULT - \$10  
CHILDREN UNDER 12 FREE  
Two-Day Group (Club) Rates Available  
\$15.00 for 25 or more tickets when purchased in advance.

**HOURS:** FRIDAY 9:00 A.M. TO 6:00 P.M.  
SATURDAY 9:00 A.M. TO 4:00 P.M.

**Special Edition 2013 ECLSTS 40' Plug Door Boxcar**

\* Show cars are available ONLY AT THE SHOW. There are NO mail orders or pre-orders for these show items. These items are of limited quantity and not guaranteed for all attendees.

# ARISTO-CRAFT INSIDER

## ECLSTS REPORT by Harry Hartman

The 2013 ECLSTS is just about upon us and things are all lined up for a GREAT Show. The vendors list has been posted online and we have 4 MORE vendors than we did last year. As of this writing date, we have 6 NEW vendors. None have been to the show before.

The hotel tells me that they have MORE rooms booked at this time than they did last year at this time. The seminar list has been published as well as the floor plan. Some really great seminars are being presented. If you attend these seminars, be sure to take the time to THANK those that are taking their time to present. I would love to attend each of them but I need to keep my ears and eyes on the two buildings and answer questions. In the past I have always heard GOOD reports of each of the seminars. The ONLY complaint we had was the NOISE level that overshadowed the speaker at times. Well this year we moved some things around in the vendors hall and we were able to open up one of the rooms for the seminars. This should help cut down on the noise level in the seminar area. We are NOT able to shut the P A system off in the room, so you will have to excuse the "vocal interruptions."

Be sure to thank the vendors and the clubs for coming to the show. I have always said there is a 'two-edged sword' with the shows. If the public does not attend, the vendors will not attend, and if the vendors do not attend, the public will not come. So if you attend and buy, then the vendors keep coming back. In some cases, you will find what you want at the show CHEAPER than you would at their store or online. One part of the 'sale equation' is gone at the shows, THE SHIPPING charges. The shipping charge for track can get expensive. The other advantage of the

Memorial Hall at the York Fagrounds - Home of the ECLSTS

The 2013 ECLSTS Show Car - Horseshoe Curve Beer Plug Door Boxcar

show is you can "see it, touch it, and in some cases, you can see it run or take it to a test track before you take it home.

The show will host a modeling contest again. TATE has stepped forward to take on the task of running the modeling contest. LSOL is not involved with it this year. LSOL will not have a booth this year but will have someone there to report on the show. Since LSOL will not be part of the show, we will not be honoring LSOL's members discount. The admission fee for everyone this year is going to be \$10.00 per day and \$18.00 for a two day pass. As always, children 12

and under, accompanied with a paying adult are FREE. If you want a look at the categories for the contest, go on Aristo-Craft's website and go to the forum section and click on the Spring ECLSTS. Look for the thread for the modeling contest for entering information.

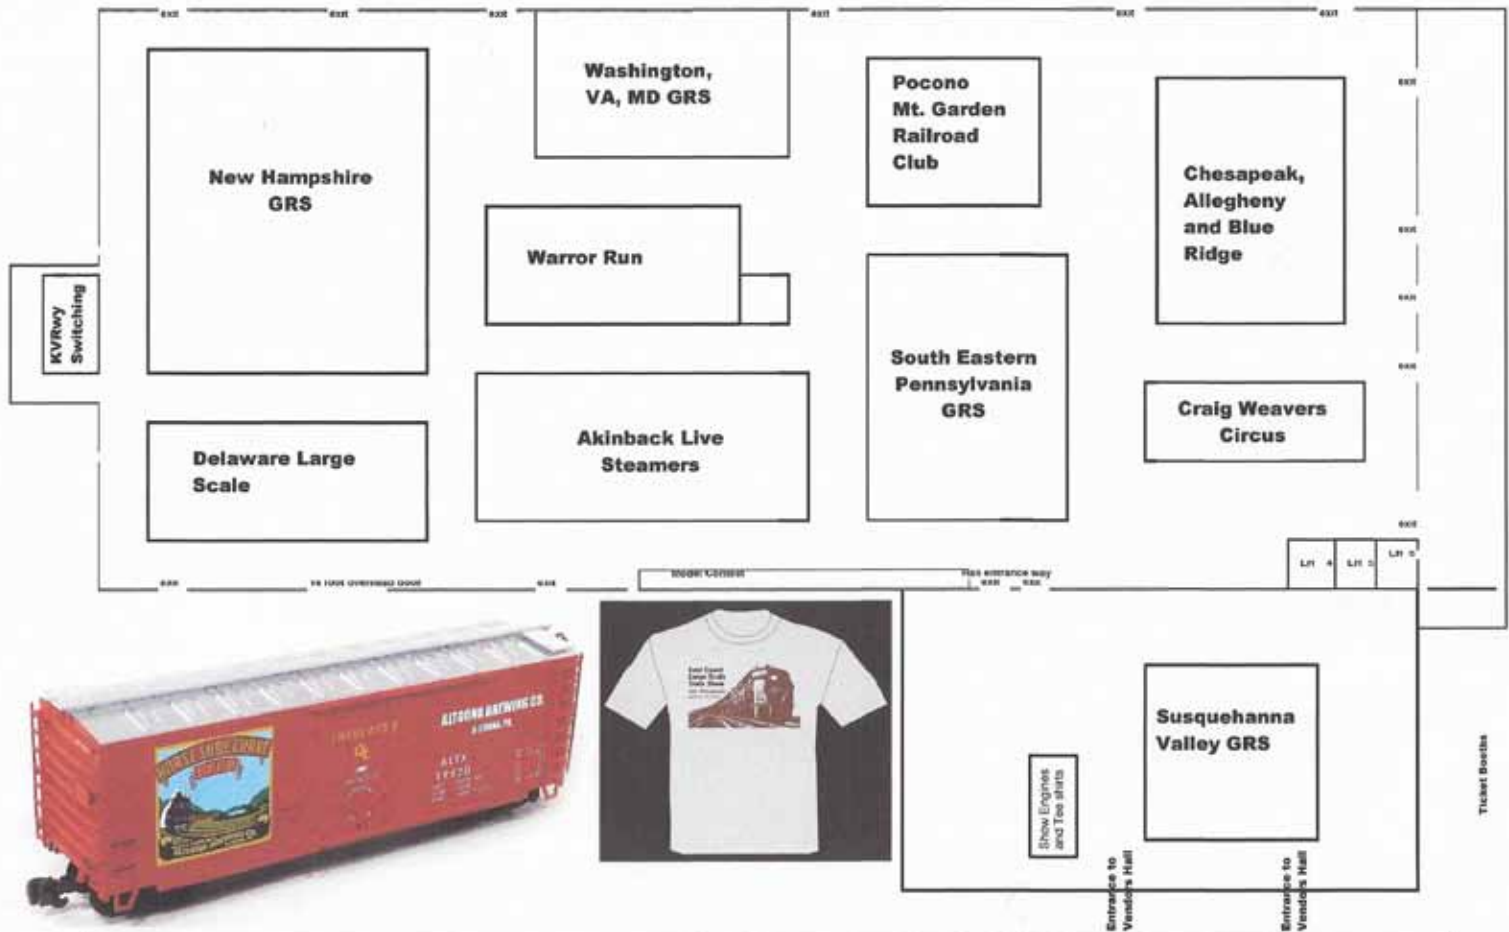

The paint sample for the show car has been posted, the tee shirt design and colors are finalized, and we are just counting down the days till the doors open on the 2013 East Coast Large Scale Train Show. You know it IS "The Place to BE for G!" We look forward to seeing you there.

# ARISTO-CRAFT INSIDER

## 2013 *SPRING* ECLSTS Club Displays for your Enjoyment

Remember to purchase your 2013 Spring ECLSTS Show Plugged Door Reefer. The Horse Shoe Curve Beer Reefer comes in 3 road numbers. It will come with **PLASTIC** WHEELS. The cost for each SHOW car will be \$60.00 EACH!  
 Dont forget to get your Spring 2013 ECLSTS Tee Shirt. Some sizes are limited, so avoid disappointment and get your shirt as soon as you get in the door

## ECLSTS Show Photos from years past

Below is the list of the seminars for the SPRING ECLSTS for 2013. These seminars will take place out in the ticket foyer area. You will notice that there is about 15 minutes between each seminar. This is to allow each presenter the time to tear down and allow the next presenter the time to set up and it will not eat into their seminar times. Please if you have a lot of questions for the presenters, and they are in the set up/tear down time, please make arrangements to speak with the presenter away from the seminar area. This will allow the presenter to tear down and not delay the next presenter in setting up and starting on time. This would be greatly appreciated. Please take the time to thank each of these presenters for their time and efforts with these seminars. 😊

## FRIDAY

### **Seminar Schedule for SPRING ECLSTS 2013**

**Front Door open at 9:00 a.m.**

#### **9:45 – 11:45 DAVID BODNAR**

Electronics, Microcontrollers & Trains - Electronic Gizmos, Gadgets, Tips,

Tricks & More! Plus an overview of the new Revolution with Sound!

\*Add interest and excitement to your railway with super bright LEDs, micro-controllers, animation techniques and other inexpensive & intriguing electronic devices. An assortment of unique electronic gizmos, gadgets and controls will be presented. These will include updates on many devices and two new projects as well as tips & tricks that you are sure to use with your railroad.

\*In addition we will examine the new sound-equipped Revolution receiver exploring its use and capabilities.

#### **12:00 – 1:00 LEWIS POLK**

"Where we're going to take the Revolution system.\*

#### **1:30 – 3:00 Jerry Chapman**

"SO you want to BUILD a Garden Railroad." 5 Important Steps ~

Design, Roadbed, Rail Choice, Power Supply Selection, & Reliability

#### **3:15 – 4:00 Stan Cedarleaf**

Cedarleaf Custom Decals will give a Power Point visual presentation to show how the use of custom decals can enhance and personalize your railroad. He will present many ideas and examples to help stimulate your own creativity and help with painting and decorating techniques.

Helping to keep model railroading fun.

Below is the list of the seminars for the SPRING ECLSTS for **2013**. These seminars will take place out in the ticket foyer area. You will notice that there is about 15 minutes between each seminar. This is to allow each presenter the time to tear down and allow the next presenter the time to set up and it will not eat into their seminar times. Please if you have a lot of questions for the presenters, and they are in the set up/tear down time, please make arrangements to speak with the presenter away from the seminar area. This will allow the presenter to tear down and not delay the next presenter in setting up and starting on time. This would be greatly appreciated. Please take the time to thank each of these presenters for their time and efforts with these seminars. 😊

## SATURDAY

### Seminar Schedule for SPRING ECLSTS 2013

**Front Door open at 9:00 a.m.**

#### 9:45 – 10:45 AXEL TILLMANN

The Future of Garden Railroading

In today's world we need to find new ways to promote our hobby. We also have a responsibility to make our hobby shine in the most positive light. Axel Tillmann will cover topics of interests, will share ideas and comments and will conclude his presentation with a short demo of the latest advances in electronic train control.

#### 11:00 – 12:00 SCOTT POLK

Scott Polk President of Polk's Model Craft Hobbies Inc will have a question and answer session. Come submit your questions and place them in the box. Scott will pull out questions from the box and answer them as long as his time permits. Come get your questions answered.

#### 12:00 – 1:00 ANDY STOBIE

Custom Installation of Aristo Receivers into Non-PNP Locos

Presentation description: Andy has an easy and effective method for customizing your older non-PNP locos for Aristo receivers and smoke control boards. His latest displays will include an Aristo sound receiver into a Dash-9, an FA-FB consist running off of just one receiver and smoke board, and speaker installations to utilize the new Aristo sound receivers.
